

Engineering Document Control and Oversight

Engineering Document Control in Oil & Gas, Utilities, Construction and Process Manufacturing – a technical challenge or business opportunity?

You are invited to a roundtable discussion hosted by I.R.I.S., IBM and McLaren Software

Why should I attend?

If you are involved in engineering, capital projects, asset operations or all three activities you will be well aware of the challenges and importance of accurate engineering documents. The success of a capital project and the efficient operation of a plant or facility can be greatly affected by how documentation is created, approved and controlled between engineering teams, contractors, vendors and regulators.

In the last 10 years Enterprise Content Management systems have become a standard within corporate IT infrastructures promising a common platform for all users. But can they really solve the complex challenges of managing engineering documentation throughout the lifecycle of an asset?

What will I get out of the Roundtable session?

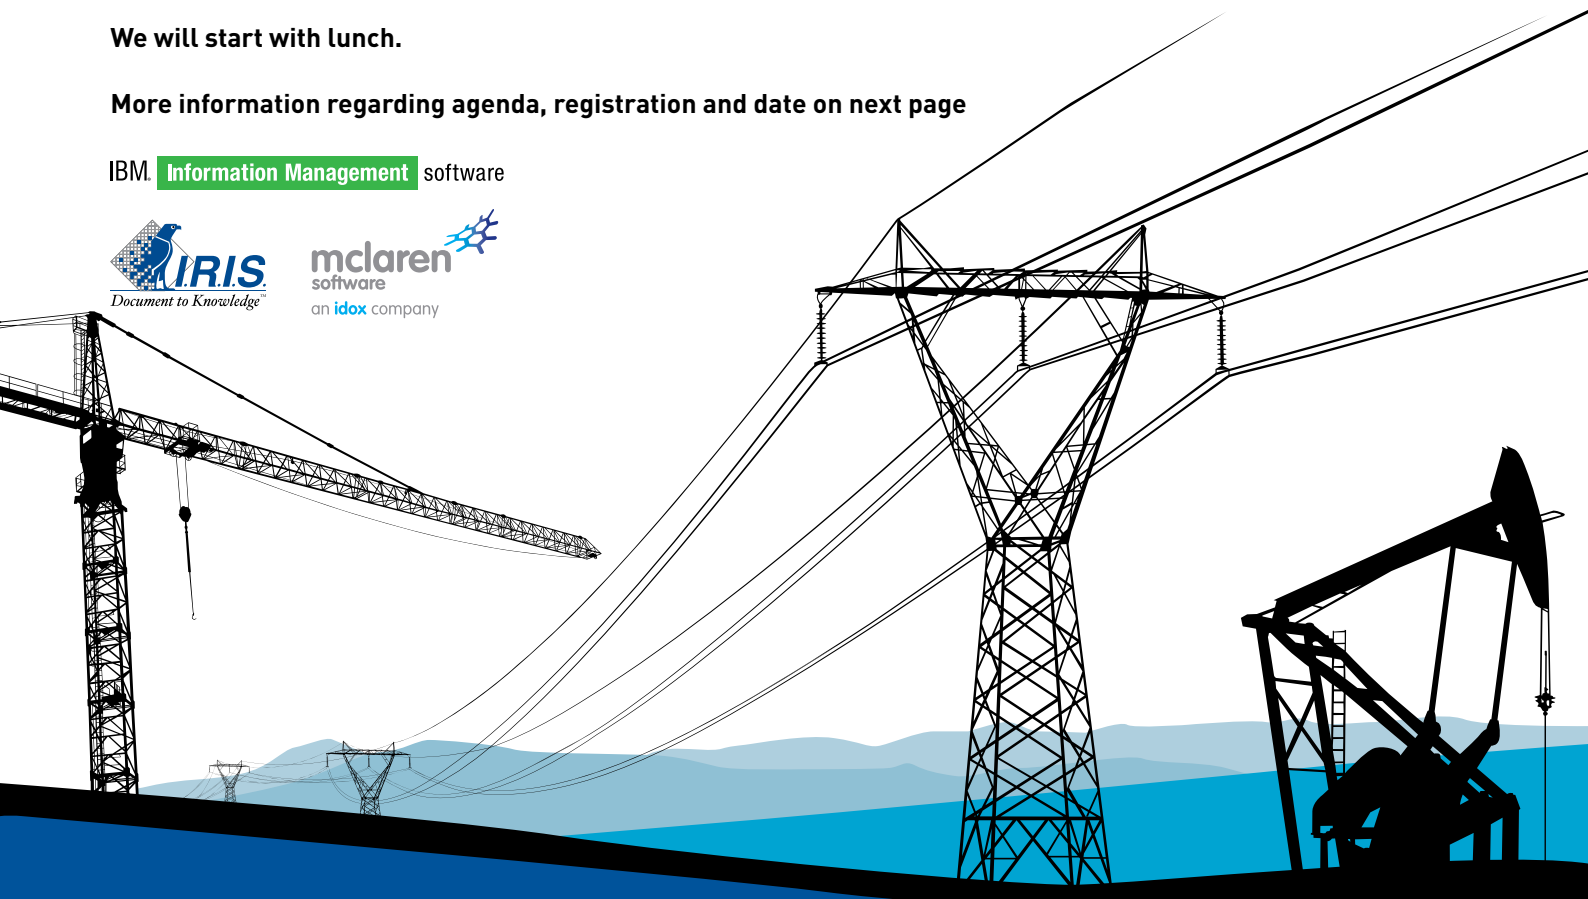

This roundtable session provides an opportunity to learn how Weyerhaeuser Inc. worked through the business and technical challenges, of implementing a multi-location, multi-discipline engineering document management and control system. Supporting both capital projects and asset operations the system is now widely used by owner operators in many asset intensive industries.

There will be ample time to ask questions and meet with other professionals and generate new ideas and techniques to apply to your own existing or planned projects.

We will start with lunch.

Engineering Document Control and Oversight

Agenda

- 11.30: Welcome & registration
Start Round table & lunch
- 12.00: Introduction and explanation why McLaren/IBM/ I.R.I.S.
Espen Skjøld Country Manager, I.R.I.S. Nordic AS
Joar Lyngaas, Country Manager Industry Solutions, IBM Norway
- 12.15: How to consolidate your enterprise-wide engineering documents and drawings systems onto a single corporate ECM platform
Greg Van Wormer – former head of Engineering Systems Manager for Weyerhaeuser Engineering Services
- 13.00: McLaren Software's ENTERPRISE ENGINEER for Asset Intensive Industries such as Engineering & Construction, Oil & Gas, Utilities and Pharmaceuticals; **Customer cases**
Tim Taylor - Chief Business Development Officer, McLaren Software Ltd
- 13.45: Q & A
- 14.00: Wrap-Up & coffee

Date and location:

The Round table session will be held the 16th of March 2011 from 11.30 – 14.30.

Clarion Hotel Stavanger

Ny Olavskleiv 8
4008 Stavanger

Registration:

[Click here in order to go to the registration site.](#)

Last date for registration is the 8th of March 2011.

Further questions:

If you have further questions to the event and the agenda, or our solutions, please contact: Espen Skjøld, IRIS Nordic AS
e-mail: espen.skjold@iriscorporate.com

We look forward to see you at our Round table event.

Best regards

I.R.I.S, McLaren Software and IBM
