Enterprise Engineer							
Version	Application	Operating Systems	Repository Support	Supported Integrations	Other	Notes	Support End
3.6.2 SP3	Server	Windows 2003 Server (SP1 & SP2) Windows Server 2003 R2 Windows Server 2008 Solaris 10 ¹ Red Hat Linux v4 update 5 ²	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Content Engine 3.5.1 & 3.5.2 FileNet Content Engine / Process Engine 4.5			¹ Solaris 10 is supported for Documentum platforms only. ² Red Hat Linux is supported for Documentum platforms only.	
	Application Server	Windows Server2003 (SP1 & SP2) Windows Server 2003 R2 Windows Server 2008	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Application Engine 3.5.1 & 3.5.2 FileNet Application Engine 4.5	Tomcat 6.0.18 (JDK1.5.0_18) BEA WebLogic 9.2.2 ³ BEA WebLogic 10.0.x JBOSS 4.0.5 (JDK 1.5.0_14) Oracle App 10g R3 (10.1.3.x) ⁴		³ BEA WebLogic 9.2.2 is required for the McLaren Enterprise Application Server. For FileNet 3.x using BEA WebLogic web application servers may require running FileNet 3.x Application Engine on BEA WebLogic 8 ⁴ Oracle Application Server is supported for Documentum platforms only	

	Viewing Server	Windows XP Pro (SP1, SP1a & SP2) Windows Server 2003 R2 Windows Server 2003 (SP1 & SP2)		Tomcat 5.5 (JDK1.5.0_14) Tomcat 6.0.18 (JDK1.5.0_14)		Includes Brava Viewer Enterprise 6.1 NOTE: Viewing server is supported on Windows platforms only.	
	Client (Work Manager)	Windows XP Pro (SP1, SP1a, SP2 & SP3) Windows Vista (SP1 & SP2)		Office XP (SP2 & SP3) Office 2003 (SP1 & SP2) Office 2007		NOTE: Supplies and installs .NET 2	
3.6.2 SP2a	Server	Windows 2003 Server (SP1 & SP2) Windows 2003 Server R2	FileNet Content Engine 4.5 FileNet Process Engine 4.5			FileNet 4.5 Platform Only NOTE: EE3.6.2 SP2a must be applied to an existing EE3.6.2 SP2 implementation	31-Dec-11
	Application Server	Windows 2003 (SP1 & SP2) Windows 2003 Server R2	FileNet Application Engine 4.5	BEA WebLogic 10.0.x (JDK 1.5.0_11) JBoss 4.0.5 (JDK 1.5.0_14)		FileNet 4.5 Platform Only	
	Viewing Server	Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server R2 Windows 2003 Server (SP1 & SP2)		Tomcat 5.5 (JDK1.5.0_14) Tomcat 6.0.16 (JDK1.5.0_14)		Includes Brava Viewer Enterprise 6.0 SR1 NOTE: Viewing server is supported on Windows platforms only. FileNet 4.5 Platform Only	
	Client (Work Manager)	Windows XP Pro (SP1, SP1a, SP2 & SP3) Windows Vista (SP1)		Office XP (SP2 & SP3) Office 2003 (SP1 & SP2) Office 2007		NOTE: Supplies and installs .NET 2 FileNet 4.5 Platform Only	

3.6.2 SP1b	Server	Windows 2003 Server (SP1 & SP2) Windows 2003 Server R2 Solaris 10 ¹ Red Hat Linux v4 update 5 ²	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Content Engine 3.5.1 & 3.5.2			¹ Solaris 10 is supported for Documentum platforms only. ² Red Hat Linux is supported for Documentum platforms only.	31-Dec-11
	Application Server	Windows 2003 (SP1 & SP2) Windows 2003 Server R2	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Application Engine 3.5.1 & 3.5.2	Tomcat 6.0.16 (JDK1.5.0_14) BEA WebLogic 9.2.2 ⁴ (JDK 1.5.0_14) JBOSS 4.0.5 Oracle App 10g R3 (10.1.3.x)		⁴ BEA WebLogic 9.2.2 is required for the McLaren Enterprise Application Server. For FileNet 3.x using BEA WebLogic web application servers may require running FileNet 3.x Application Engine on BEA WebLogic 8 ⁵ Oracle Application Server is supported for Documentum platforms only	
	Viewing Server	Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server R2 Windows 2003 Server (SP1 & SP2)		Tomcat 5.5 (JDK1.5.0_14) Tomcat 6.0.16 (JDK1.5.0_14)		Includes Brava Viewer Enterprise 6.0 SR1 NOTE: Viewing server is supported on Windows platforms only.	
	Client (Work Manager)	Windows XP Pro (SP1, SP1a, SP2 & SP3) Windows Vista (SP1)		Office XP (SP2 & SP3) Office 2003 (SP1 & SP2) Office 2007		NOTE: Supplies and installs .NET 2	
	Server	Windows 2003 Server (SP1 & SP2) Windows 2003 Server R2 Solaris 10 ¹ Red Hat Linux v4 update 5 ²	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Content Engine 3.5.1 & 3.5.2			¹ Solaris 10 is supported for Documentum platforms only. ² Red Hat Linux is supported for Documentum platforms only.	

3.6.2 SP1a	Application Server	Windows 2003 (SP1 & SP2) Windows 2003 Server R2	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Application Engine 3.5.1 & 3.5.2	Tomcat 6.0.16 (JDK1.5.0_14) BEA WebLogic 9.2.2 ⁴ (JDK 1.5.0_14) JBOSS 4.0.5 Oracle App 10g R3 (10.1.3.x)		⁴ BEA WebLogic 9.2.2 is required for the McLaren Enterprise Application Server. For FileNet 3.x using BEA WebLogic web application servers may require running FileNet 3.x Application Engine on BEA WebLogic 8 ⁵ Oracle Application Server is supported for Documentum platforms only	31-Dec-11
	Viewing Server	Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server R2 Windows 2003 Server (SP1 & SP2)		Tomcat 5.5 (JDK1.5.0_14) Tomcat 6.0.16 (JDK1.5.0_14)		Includes Brava Viewer Enterprise 6.0 SR1 NOTE: Viewing server is supported on Windows platforms only.	
	Client (Work Manager)	Windows XP Pro (SP1, SP1a, SP2 & SP3) Windows Vista (SP1)		Office XP (SP2 & SP3) Office 2003 (SP1 & SP2) Office 2007		NOTE: Supplies and installs .NET 2	
3.6.2 SP1	Server	Windows 2003 Server (SP1 & SP2) Windows 2003 Server R2 Solaris 10 ¹ Red Hat Linux v4 update 5 ²	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Content Engine 3.5.1 & 3.5.2			¹ Solaris 10 is supported for Documentum platforms only. ² Red Hat Linux is supported for Documentum platforms only.	31-Dec-11
	Application Server	Windows 2003 (SP1 & SP2) Windows 2003 Server R2	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4, SP5 & SP6) Documentum Content Server 6.0 (SP1) Documentum Content Server 6.5 (SP1) FileNet Application Engine 3.5.1 & 3.5.2	Tomcat 6.0.16 (JDK1.5.0_14) BEA WebLogic 9.2.2 ⁴ (JDK 1.5.0_14) JBOSS 4.0.5 Oracle App 10g R3 (10.1.3.x)		⁴ BEA WebLogic 9.2.2 is required for the McLaren Enterprise Application Server. For FileNet 3.x using BEA WebLogic web application servers may require running FileNet 3.x Application Engine on BEA WebLogic 8	
	Viewing Server	Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server R2 Windows 2003 Server (SP1 & SP2)		Tomcat 5.5 (JDK1.5.0_14) Tomcat 6.0.16 (JDK1.5.0_14)		Includes Brava Viewer Enterprise 6.0 SR1 NOTE: Viewing server is supported on Windows platforms only.	
	Client (Work Manager)	Windows XP Pro (SP1, SP1a, SP2 & SP3) Windows Vista (SP1)		Office XP (SP2 & SP3) Office 2003 (SP1 & SP2) Office 2007		NOTE: Supplies and installs .NET 2	

3.6.2	Server	Windows 2003 Server (SP1 & SP2) Windows 2003 Server R2 Solaris 10 ¹ Red Hat Linux v4 update 5 ²	Documentum Content Server 5.3 (SP1, SP2, SP3, SP4 & SP5) Documentum Content Server 6.0 (SP1) FileNet Content Engine 3.5.1 & 3.5.2			¹ Solaris 10 is supported for Documentum platforms only. ² Red Hat Linux is supported for Documentum platforms only.	31-Dec-11
	Application Server	Windows 2003 (SP1 & SP2) Windows 2003 Server R2 Solaris 10 ³	Documentum DFC 5.3 (SP1, SP2, SP3, SP4 & SP5) Documentum DFC 6.0 (SP1) FileNet Application Engine 3.5.1 & 3.5.2	Tomcat 5.5.25 (JDK1.5.0_14) BEA WebLogic 8.1 SP5 JBOSS 4.2.2 (JDK1.5.0_14) Oracle App 10g R2		³ Solaris 10 is not supported for Oracle Application Server	
	Viewing Server	Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server R2 Windows 2003 Server (SP1 & SP2)		Tomcat 5.5.25 (JDK1.5.0_14) BEA WebLogic 8.1 SP5		Includes Brava Viewer Enterprise 6.0 SR1 NOTE: Viewing server is supported on Windows platforms only.	
	Client (Work Manager)	Windows XP Pro (SP1, SP1a & SP2) Windows Vista		Office XP (SP2 and SP3) Office 2003 (SP1 and SP2) Office 2007		NOTE: Supplies and installs .NET 2	
3.6.1	Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Windows 2003 Server R2 Solaris 10*	Documentum Content Server 5.3 (SP1, SP2, SP3 & SP4), 5.3 SP5** FileNet Content Engine 3.5.1 / 3.5.2			* Solaris 10 is supported for Documentum platforms only. ** Refer to Knowledgebase article 1917 for details how to implement	31-Dec-10
	Application Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Windows 2003 Server R2 Solaris 10**	Documentum DFC 5.3 (SP1, SP2, SP3 & SP4) FileNet Application Engine 3.5.1	Tomcat 5.0.28 (JDK 1.4.2_05) Tomcat 5.5.16 (J2SE 1.5.0_09) JBOSS 4.0.5 (J2EE 1.4.2_08) BEA WebLogic 9.1 BEA WebLogic 8.1 SP4 & SP5 Oracle Application Server 10g R2		Viewing Server supported on Windows platforms only. **Solaris 10 not supported for Oracle Application Server	

	Viewing Server	Windows 2003 Server R2 Windows 2003 Server (SP1) Windows XP Pro (SP1, SP1a & SP2)		Tomcat 5.0.28 (JRE 1.4.2_06) BEA WebLogic 8.1 SP4	Brava Enterprise 5.3		
	Client (Work Manager)	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2)		Office XP (SP2 and SP3) Office 2003 (SP1 and SP2) Office 2007		Supplies and installs .Net version 2	
3.6.0a	Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Windows 2003 Server R2 Solaris 10*	Documentum Content Server 5.3 (SP1, SP2, SP3 & SP4) FileNet Content Engine 3.5.1 / 3.5.2			* Solaris 10 is supported for Documentum platforms only.	31-Mar-09
	Application Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Windows 2003 Server R2 Solaris 10**	Documentum DFC 5.3 (SP1, SP2, SP3 & SP4) FileNet Application Engine 3.5.1	Tomcat 5.0.28 (JDK 1.4.2_05) Tomcat 5.5.16 (J2SE 1.5.0_09) BEA WebLogic 9.1 BEA WebLogic 8.1 SP4 & SP5 SAP Netweaver 2004 Oracle Application Server 10g R2		Viewing Server supported on Windows platforms and Tomcat 5.0.28 only. **Solaris 10 not supported for SAP or Oracle Application Server	
	Viewing Server	Windows 2003 Server R2 Windows 2003 Server (SP1) Windows XP Pro (SP1, SP1a & SP2)		Tomcat 5.0.28 (JRE 1.4.2_06) BEA WebLogic 8.1 SP4	Brava Enterprise 5.3		
	Client (Work Manager)	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2)		Office XP (SP2 and SP3) Office 2003 (SP1 and SP2)		Supplies and installs .Net version 2	
	Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Windows 2003 Server R2 Solaris 10*	Documentum Content Server 5.3 (SP1, SP2, SP3 & SP4) FileNet Content Engine 3.5.1 / 3.5.2			* Solaris 10 is supported for Documentum platforms only.	

3.6	Application Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Windows 2003 Server R2 Solaris 10**	Documentum DFC 5.3 (SP1, SP2, SP3 & SP4) FileNet Application Engine 3.5.1	Tomcat 5.0.28 (JDK 1.4.2_05) Tomcat 5.5.16 (J2SE 1.5.0_09) BEA WebLogic 9.1 BEA WebLogic 8.1 SP4 & SP5 SAP Netweaver 2004 Oracle Application Server 10g R2		Viewing Server supported on Windows platforms and Tomcat 5.0.28 only. **Solaris 10 not supported for SAP or Oracle Application Server	31-Mar-09
	Viewing Server	Windows 2003 Server R2 Windows 2003 Server (SP1) Windows XP Pro (SP1, SP1a & SP2)		Tomcat 5.0.28 (JRE 1.4.2_06) BEA WebLogic 8.1 SP4	Brava Enterprise 5.3		
	Client (Work Manager)	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2)		Office XP (SP2 and SP3) Office 2003 (SP1 and SP2)		Supplies and installs .Net version 2	
3.5.1b	Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Solaris 10*	Documentum Content Server 5.2.5 SP4 / 5.3 (SP1, SP2, SP3) FileNet Content Engine 3.5.1 / 3.5.2			The 3.5.1b patch must be installed over the 3.5.1a patch. * Solaris 10 is supported for Documentum platforms only.	31-Mar-09
	Application Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Solaris 10**	Documentum DFC 5.3 (SP1, SP2 SP3) FileNet Content Engine 3.5.1	Tomcat 5.0.28 BEA WebLogic 9.1 BEA WebLogic 8.1 SP4 SAP Netweaver 2004 Oracle Application Server 10g R2	JDK 1.4.2_05 for Tomcat and BEA J2SE 1.4.2_08 for SAP Netweaver (Oracle installs its own)	Viewing Server supported on Windows platforms and Tomcat 5.0.28 only. **Solaris 10 not supported for SAP or Oracle Application Server	
	Client (Work Manager)	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2)		Office XP (SP2 and SP3) Office 2003 (SP1 and SP2)		Supplies and installs .Net version 2	
3.5.1a	Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Solaris 10*	Documentum Content Server 5.2.5 SP4 / 5.3 (SP1, SP2, SP3) FileNet Content Engine 3.5.1 / 3.5.2			* Solaris 10 is supported for Documentum platforms only.	31-Mar-09
	Application Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Solaris 10**	Documentum DFC 5.3 (SP1, SP2 SP3) FileNet Content Engine 3.5.1	Tomcat 5.0.28 BEA WebLogic 9.1 BEA WebLogic 8.1 SP4 SAP Netweaver 2004 Oracle Application Server 10g R2	JDK 1.4.2_05 for Tomcat and BEA J2SE 1.4.2_08 for SAP Netweaver (Oracle installs its own)	Viewing Server supported on Windows platforms and Tomcat 5.0.28 only. **Solaris 10 not supported for SAP or Oracle Application Server	
	Client (Work Manager)	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2)		Office XP (SP2 and SP3) Office 2003 (SP1 and SP2)		Supplies and installs .Net version 2	

3.5.1	Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Solaris 10*	Documentum Content Server 5.2.5 SP4 / 5.3 (SP1, SP2, SP3) FileNet Content Engine 3.5.1 / 3.5.2			* Solaris 10 is supported for Documentum platforms only.	31-Mar-09
	Application Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server (SP1) Solaris 10**	Documentum DFC 5.3 (SP1, SP2 SP3) FileNet Content Engine 3.5.1	Tomcat 5.0.28 BEA WebLogic 9.1 BEA WebLogic 8.1 SP4 SAP Netweaver 2004 Oracle Application Server 10g R2	JDK 1.4.2_05 for Tomcat and BEA J2SE 1.4.2_08 for SAP Netweaver (Oracle installs its own)	Viewing Server supported on Windows platforms and Tomcat 5.0.28 only. **Solaris 10 not supported for SAP or Oracle Application Server	
	Client (Work Manager)	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2)		Office XP (SP2 and SP3) Office 2003 (SP1 and SP2)		Supplies and installs .Net version 2	
3.5.0a	Server	Windows 2000 (SP4) Windows XP Pro (SP1, SP1a & SP2) Windows 2003 Server	Documentum Content Server 5.2.5 SP4 / 5.3 (SP1 and SP2) FileNet Content Engine 3.5.1 / 3.5.2				31-Dec-08

Notes:

- 1 Each individual table indicates that a separate License Key may be required for that product
- 2 “Still Supported”, means a product release on which customers with a current Support Contract can expect to receive Technical Support and purchase additional licenses
- 3 “Currently Shipping”, means that product release is currently being sent out to new customers. Customers with a current Support Contract can also expect to receive technical support and purchase additional licenses for this product
- 4 In general, McLaren Software supports the current Full Release version of a product and the previous Full Release version: including any Patch Releases
- 5 For details on how to receive technical support on McLaren applications, please refer to our McLaren Product Support User's Guide, which can be downloaded from <http://www.mclarensoftware.com/support/>
- 6 If a product, or version of a product, is not listed in the above tables, then McLaren Software no longer supports it.
- 7 If you have a current Support Contract for one of the products listed above, but are using an earlier version, we strongly advise you to upgrade to the latest appropriate version. Members of the McLaren Support team will only provide assistance on the above products and versions.
- 8 To obtain a copy of the current full release of your licensed McLaren application, please contact sales@mclarensoftware.com
- 9 All Software releases shown above can be obtained direct from <http://www.mclarensoftware.com/support/> . Our web site also contains a section with the Release Notes that accompanied each patch.
- 10 Items Highlighted in GREY are under support but are no longer available for purchase from McLaren
- 11 Enterprise Engineer is now fully certified for use with Citrix XenApp (formerly Presentation Server) version 4.x. It should be noted that Citrix allows the full use of McLaren Work Manager from a remote location (Citrix Server) without any installation on the user's personal computer. As Work Manager needs to have access to the file system in order to cache documents that are viewed and edited, the user must have a profile on the Citrix Server on which Work Manager is installed. This allows Work Manager to download files to the users profile location as required. Work Manager installed in this way cannot be used to manage documents stored on the individuals personal computer. Likewise, all integrations (MS Word, Outlook, Excel, AutoCAD, MicroStation) will only be functional when those applications are installed and published on the same Citrix server as Work Manager.

12 Support for Vmware. Use of VMWare across all EE components and software is supported - but customers should ensure sufficient resources (e.g. Memory, CPU) are made available to the images running in production to prevent any performance impact. Customers should also be aware that McLaren certifies the use of EE on the VMWare Workstation application and not on any of the extended server based models of VMWare. With this in mind, we will provide support on these versions of VMWare, but we must be able to replicate any VMWare specific issues with VMWare Workstation.

	Current shipping version
	No longer available, but still under support

Release Types Explained:

Patch Release

A patch release is generated as a direct result of a customer-raised defect (bug). Typically, these are raised via support, and escalated through to Product Management. Due to the urgent nature of any such defect, we may agree that such a patch release is appropriate, and the important factor is undoubtedly always time.

We would always aim to provide a patch release to that and all other appropriate customers, within an appropriate timeframe.

In consideration of this, we perform a series of regression tests, in addition to testing the actual defect itself. The level of these regression tests varies, but is restricted on the basis of time available.

A patch release may be used by any customer eligible to receive it, but customers should understand that such a release will have had limited, and specific testing, focusing on the defect raised.

Ideally, any releases should be applied to non-production test systems initially, but patch releases are intended to resolve a specific problem for a customer with a non-operational production system.

Any customer that chooses to apply a patch release, should do so recognizing the fact that the patch is aimed at a specific defect resolution, and as a result will not have undergone the full functionality testing of a Service Pack/Major or Minor release.

Service Pack

McLaren will start to produce Service Pack updates to our products at twice yearly intervals, from early 2005.

These Service Packs (normally an SP1 and SP2 each year) will be focusing on two areas.

SP1 will primarily focus on roll up of existing patches that have previously been released since the last Major/Minor or Service Pack release. Some additional defects may also be resolved in this SP1.

SP2 will again include roll up of any patches issued since the last Major/Minor or Service Pack release, but will additionally add new functionality in

the form of change requests.

Testing for service pack releases will focus on the defects or change requests that it incorporates, but they will include a much wider set of regression tests, comparable to those of a Minor release (detailed below).

Where new platform/third party software integrations are also to be certified by the service pack, a much higher level of integration testing will also be performed.

Due to the level of testing undertaken for a service pack release, there will be a maximum of two service pack releases per product per year.

Customers are encouraged to move to the latest suitable Service Pack (matching their operating environment), given that these have undergone full functionality testing.

Major/Minor Releases

A Major release may be best explained by saying 'a 5.0 version on the previous 4.7 version of a product'.

Major releases are essentially a major change to the product in terms of functionality, architecture, integrations etc. Of course, any previously issued Service Packs, Minor releases and Patch releases since the last Major, will be incorporated.

A Minor release may be best explained by saying 'a 4.3 or 4.2.1 version on the previous 4.2 version of a product'.

Minor releases focus on the roll up of previous Service Pack and Patch releases issued since the last Major/Minor, but may also include some additional defect resolutions and/or change requests

Major and Minor releases are extended a level of testing that covers all included functionality of previous releases, and all new functionality added. Every function and integration is tested fully. This testing will always include multiple environments.

There will be a maximum of one Minor (or Major) release per year per product, dependent on the timing of the Service Packs and other third party releases. Again, this release cycle reflects the deep level of testing that is provided with these releases.

Customers are encouraged to move to the latest suitable Major/Minor release (matching their operating environment), given that these have undergone full functionality testing.

Support Notifications

It is important to note that McLaren, in common with many software vendors, operates a 'Supported' and a 'Certified' program for software integrations.

We may issue notifications that any given product is now supported, pending formal certification.

The "Supported" classification is used when we have performed an element of regression testing on any given product, and are happy that customers can use the environment advised, pending full Certification. It is important to note however, that our testing for 'Supported' notifications does not cover all functionality – but does allow our customers to use the integrations and raise support issues and defects with McLaren.

We issue such notices in order to improve the speed at which customers can begin to work with new environments, usually in a test system. Typically, these notifications are issued where the next Service Pack/Major release/ Minor release (and associated full Certification), is not imminent.

Customers using our products that are currently 'supported' but not yet 'certified' should understand that since complete testing has not been performed, issues may arise, but McLaren will respond to these issues in a timely manner, for example, via a Patch Release.

Certification involves a significantly more complex testing mechanism: all product functionality and interoperability will be fully tested, usually across multiple environment scenarios.

Certification is required by many of our customers before they will install any given product into a specific environment. Customers utilizing fully certified products can be assured that this integration has been fully tested, covering all product functionality.

The above information represents the definitive statement regarding our support processes and policies, and are controlled by the McLaren ISO Accredited Quality system to ensure their accuracy.
